

OUR FUNDING PATHWAY

*After the assessment, IFR funding will be requested to pay for the treatment. This process can take 3-6 months. Treatment will commence once payment has been received.

**Where IFR is refused, The Feeding Trust will attempt to fundraise 50% to match-fund the cost of treatment. Parents will need to fundraise the other 50% (£2000). Please be aware that there is a waiting list for clients requiring match-funding. The Feeding Trust needs to have all 50% of funds before therapy can start, parents need to have 25% before therapy can commence. If parent(s) do not wish to apply for IFR or wait for the outcome of the IFR, they can self-fund 100% of the treatment (£4000). If parents choose this option, The Feeding Trust will not seek to recoup the cost of the assessment (£1000) from the parents. We will fundraise to cover this. Parents who have chosen to self-fund can explore further fundraising options such as GoFundMe and local charities.
