

PFD Training for Healthcare Professionals

Half day (3 hour) course suitable for healthcare professionals working with children including:

- Introducing the ICF diagnosis Paediatric Feeding Disorder (PFD)
- Introducing the concept of eating as a learning process, that can be challenging for some children
- Challenging some of the myths and misconceptions around children's feeding and how these can be unhelpful.
- How to differentiate between PFD and ARFID
- Identification of skill deficits that affect a child's ability to learn to eat
- Toolkit of practical hands on strategies to support mealtimes, food exposure and developing the skills to eating.
- Feel confident in knowing when to refer on to other professionals.
